

# MixRite 568AG

## Important Component Materials

Engine Assembly is Nylon 12  
Body is Nylon 12 reinforced with fiberglass  
Viton Extreme chemical piston seal  
EPDM orings in Engine assembly  
302 springs in engine assembly

## Chemical check valve components

EPDM seal  
Hastelloy spring  
EPDM o-ring

- Suitable for hundreds of cleaning chemicals
- All kinds of fertilizers
- Sanitizers that are not corrosive when diluted to 1oz per gallon
- Mild acids that do not create heat
- Will accurately inject Vitamins and Minerals for Swine and Cattle production
- Minimum Flow rate is .17 GPM or 22oz per minute
- Maximum flow is 11 gpm
- Maximum operating pressure is 120 PSI
- Maximum flow is achieved at less than 60 PSI
